

**Table 5-6**  
**Method 8151A Sample Quantitation Limits for Chlorinated Herbicides<sup>a</sup>**

<b>Compounds</b>	<b>Water (µg/L)</b>	<b>Sediment (µg/kg)</b>
2,4-D	12	240
2,4-DB	9.1	182
2,4,5-TP (Silvex)	5.0	100
2,4,5-T	5.0	100

Notes:

- a. Specific quantitation limits are highly matrix-dependent. The laboratory-derived MDL must be at least a factor of three less than the SQLs provided in this table. Quantitation limits listed for sediment are based on wet weight.  
ug/kg = micrograms per kilogram  
ug/L = micrograms per liter
